

DSG TRANSMISSION FLUID

Full Synthetic Direct Shift Gear Box Transmission Fluid

Description

DSG transmission Fluid is a full synthetic transmission fluid.

It was specifically composed for the double clutch transmissions (DCT) of modern passenger cars in order to ensure a trouble-free operation.

It is primarily intended for the DSG of VAG, but can perfectly be used in other 6-speed DCT transmissions such as Ford PowerShift, Mitsubishi TC-SST, Volvo PowerShift, Chrysler Power-shift or BMW Drive logic 7-speed and others.

Its anti-wear protection ensures a significantly longer service life of the gearbox and a very smooth, vibration-free switching.

Excellent oxidation and thermal stability guarantees a longer service life of the oil.

Quality level

FORD WSS-M2C 936-A
VW TL 52182

Available in

Cartons of 24x1 L, 12x2 L and 6x5 L.
Barrels of 30, 60 and 208 L.

Application

Specifically composed for the double clutch transmissions (DCT) of modern passenger cars.

Typical properties

Density 15°C	0.849
Viscosity cst 40°C	38
Viscosity cst 100°C	7.5
Viscosity index	170
Pourpoint °C	-49
Flashpoint COC °C	197

Average oil analysis without engagement
